

TEST PLAN & TEST CASE SUITE

Feature: Password Reset via Email Link

Application: Juice Utility Customer Self-Service Portal

Prepared by: Eric Workman

Status: Ready for Execution — test cases authored, pending test environment setup

TEST PLAN

1. Overview

This test plan covers the password reset feature for the Juice Utility customer portal (hypothetical). The feature allows registered customers to reset their password via an email link. This plan outlines scope, approach, and pass/fail criteria for manual testing of this feature.

2. Scope

In scope:

- Password reset request and email delivery
- Reset link behaviour — validity, expiry, single-use, redirection
- Password update confirmation and login with new credentials
- Edge cases — invalid email, expired link, repeated use

Out of scope:

- Backend email server configuration
- Account creation and registration
- Mobile app portal

3. Test Approach

Manual functional testing across multiple browsers (Chrome, Firefox, Safari). Tester will execute each case independently and document results, evidence, and any defects found.

4. Entry Criteria

- Portal is deployed and accessible in test environment
- Test accounts exist with valid registered emails
- Email delivery is functional for testing

5. Exit Criteria

- All high priority test cases executed
- No open critical or high severity defects
- All failed cases have logged defect reports

6. Pass/Fail Definition

PASS — actual result matches expected result

FAIL — any deviation from expected result; exact deviation tested for reliable recreation and logged

7. Risks & Assumptions

- email delivery time may impact testing timeline
- expiry duration must be known and ideally configurable
- test environment might not fully simulate production email behaviour

TEST CASES

TEST CASE 001

Title: Password reset link received after valid email submission

Priority: High

Preconditions: User has a registered account with a valid email address

Steps:

1. navigate to the portal login page
2. click "Forgot Password"
3. enter registered email address
4. click Submit

Expected Result:

- user receives a password reset email within X minutes
- email received containing a valid reset link

Actual Result:

Status: [] Pass [] Fail

Notes:

TEST CASE 002

Title: Reset link redirects to password update page

Priority: High

Preconditions: TC001 passed, reset email received

Steps:

1. open reset email
2. click the reset link

Expected Result:

- user is redirected to a password update page

Actual Result:

Status: [] Pass [] Fail

Notes:

TEST CASE 003

Title: Password successfully updated with valid new password

Priority: High

Preconditions: TC002 passed, user is on password update page

Steps:

1. enter a new password that meets password requirements
2. confirm new password in second field
3. click Submit

Expected Result:

- password is updated
- user receives confirmation
- user is redirected to login page

Actual Result:

Status: [] Pass [] Fail

Notes:

TEST CASE 004

Title: User can log in with new password after reset

Priority: High

Preconditions: TC003 passed

Steps:

1. navigate to login page
2. enter email and new password
3. click Login

Expected Result:

- user successfully logs in

Actual Result:

Status: [] Pass [] Fail

Notes:

TEST CASE 005

Title: Old password no longer works after reset

Priority: High

Preconditions: TC003 passed

Steps:

1. navigate to login page
2. enter email and old password
3. click Login

Expected Result:

- login is rejected
- user is shown an invalid credentials message
- user remains unauthenticated

Actual Result:

Status: [] Pass [] Fail

Notes:

TEST CASE 006

Title: Reset link expires after use

Priority: High

Preconditions: TC003 passed, reset link already used once

Steps:

1. return to original reset email
2. click the reset link again

Expected Result:

- reset link is invalid after first use
- user is shown an error message indicating the link is invalid or already used

Actual Result:

Status: [] Pass [] Fail

Notes:

TEST CASE 007

Title: Reset request submitted with unregistered email address

Priority: Medium

Preconditions: None

Steps:

1. navigate to login page
2. click "Forgot Password"
3. enter an email address not registered in the system
4. click Submit

Expected Result:

- system displays a generic confirmation message
- system doesn't reveal whether or not the email exists in the system

Actual Result:

Status: [] Pass [] Fail

Notes: Security consideration- confirming or denying email existence can assist account enumeration attacks

TEST CASE 008

Title: Reset link expires after time limit without use

Priority: Medium

Preconditions: TC001 passed, reset email received but not acted on

Steps:

1. wait until link expiry period has passed without using the link
2. click the reset link

Expected Result:

- expired reset link is no longer functional
- user is shown an error indicating the link has expired
- user is shown an option to request a new one

Actual Result:

Status: [] Pass [] Fail

Notes:

TEST CASE 009

Title: Password reset fails with invalid password format

Priority: High

Preconditions: TC002 passed, user on password update page

Steps:

1. enter a new password that doesn't meet formatting rules
2. confirm password
3. click submit

Expected Result:

- user receives an error message explaining password requirements
- password is not reset

- user remains on password reset page

Actual Result:

Status: [] Pass [] Fail

Notes:

Examples of invalid formatting may include:

- password too short
- missing special character
- missing uppercase letter
- missing number
